DETAILED ACTION

The amendment filed 5/06/2004 is acknowledged.

Allowable Subject Matter

Claims 14 and 16-26 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claim 14 is the applicant's clarification of the use of the term "input drive shaft" in line 12 and further including that the output drive shaft of the transmission is operatively or "effectively" connected to a wall of the engine housing. The prior art of record does not teach an engine housing, a crankshaft, a parallel auxiliary shaft driven by the crankshaft for powering the transmission and "input drives shafts" for vehicle wheels such tat an output drive shaft un operative connection with the transmission and the input drove shafts for driving vehicle wheels, arranged such that the crankshaft and auxiliary shaft are in vertically running planes at distance from one another and the crankshaft plane is offset at a distance from the auxiliary plane. A combination of these and other limitations have not been reasonably found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
